DETAILED ACTION

Response to Amendment

1. Claims 1-10 and 13-16 have been canceled.
2. Claims 11 and 12 have been amended.

Allowable Subject Matter

3. Claims 11 and 12 are allowed.
4. The following is an examiner's statement of reasons for allowance: Claims 11 and 12 both recite steps for a method for authorizing the use of a configurable device. The steps include detecting configurations to determine whether to authorize the continued use of the device. The detecting step includes the step of receiving usage information, which includes instruction type and instruction execution frequency. Although the preceding steps of the method were all rejected in the first office action on the merits, no art was found that either anticipated or rendered obvious the inclusion of the named resources when determining whether to continue the authorized use of the device. Alpert et al. discloses using instruction execution frequency within an optimization method but there is no suggestion or motivation to use the instruction execution frequency when determining whether to authorize the continued use of the device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
